THREAT DEFENSE

QuickStart Deployment Services

Optimise Infoblox Threat Defense Deployments with QuickStart Services

Realise the full value of an Infoblox Threat Defense investment with Professional Services

Our Infoblox Threat Defense QuickStart service helps your customers quickly implement Infoblox Threat Defense, enabling them to realise benefits such as minimised breaches, faster Incident Investigation & response time, maximised existing network security investments, and reduced spiralling security costs.

What is Infoblox Threat Defense QuickStart?

QuickStart services are designed to expedite the onboarding process for new Infoblox Threat Defense users. Our experts will:

- Design an Infoblox Threat Defense deployment model
- Perform administration setup
- Configure Policies, Network scope DNS forwarding proxies, Cloud Services Portal, Threat feed configuration
- Perform production changes leading to a production rollout
- Compose a configuration document, outlining performed activities
- Provide Knowledge Transfer

QuickStart Packages

Here are the Infoblox Threat Defense QuickStart packages we offer:

Details	Small	Medium	Large
Number of hosts not to exceed	5	10	20

Term (months)	3	6	9

Service benefits for customers include:

- Save time on mapping out a deployment strategy
- Quickly establish secured access privileges for admin staff
- Optimise effective deployment by having Exclusive Networks' Infoblox experts configure the solution
- Rely on our expertise in implementing production changes to unique hybrid network environments leading up to rollout
- Optimise security operations well into the future with guidance from our experts on solution best practices

About Infoblox Threat Defense

Infoblox Threat Defense allows customers to quickly deploy hybrid DNS-layer security everywhere. It helps prevent data exfiltration and malware C&C communications via DNS. It centrally aggregates and distributes curated internal and external threat intelligence to the existing security infrastructure and enables rapid investigation to identify context and prioritise threats.

Infoblox Threat Defense bundles:

- Infoblox DNS Firewall
- Infoblox Threat Insight in the Cloud
- Infoblox Threat Intelligence Data Exchange (TIDE)
- Infoblox Dossier

Why Choose Our Professional Services?

- **Expert Guidance:** Our Infoblox Threat Defense specialists will leverage their extensive knowledge to optimise your customer's solution.
- **Proven Methodology:** We employ well-defined and successful project plans to ensure timely completion and value delivery.
- **Risk Mitigation:** Our experience minimises project risks and ensures a smooth implementation.
- **Knowledge Transfer:** We prioritise communication and empower your customer's team to confidently manage the Infoblox Threat Defense solution.
