

UNIVERSAL DDI

QuickStart Deployment Services

Unlock the Power of Universal DDI Quicker with QuickStart Services

Maximise your customer's Infoblox Universal DDI investment with Professional Services

Our Infoblox Universal DDI QuickStart service helps you get your customers up and running swiftly, so they can take faster advantage of all the benefits this powerful solution offers.

What is Infoblox Universal DDI QuickStart?

QuickStart services are designed to expedite the onboarding process for new Infoblox Universal DDI users. Our experts will handle:

- **A Kickoff Meeting:** to Introduce the team, discuss the scope and answer any questions
 - **Configuration:** of one SSO between Customer network and Infoblox portal
 - **Verbal Knowledge Transfer sessions:** on Universal DDI cloud management and/or Universal Asset Insights cloud discovery
-

QuickStart Packages

Our QuickStart packages vary by:

- Defining a number of admin objects
- Configuring a number of Universal DDI cloud configurations
- Deploying a number of NIOS-X servers, DNS and DHCP objects
- Connecting a number of grids
- Assistance with a number of go live events

Here are the Infoblox Universal DDI QuickStart packages we offer:

Package	Term (from PO date)	NIOS-X Servers or NIOS-X as a Service instance deployment	UDDI MGMT & UAI Cloud Discovery (Azure, AWS, GCP)	UDDI Management of NIOS Grids	Knowledge Transfer	Go-Live event(s) assistance
Micro	3 months	0	0	2	1 hour	0
Small	3 months	10	2	2	1 hour	1
Medium	6 months	15	2	2	2 hours	1
Large	9 months	20	3	4	2 hours	2

All packages offer User accounts and permissions.

All packages, except Micro, offer:

- Creating IP spaces, address blocks, subnets, ranges and fixed addresses
- Creating DHCP configuration profiles, option spaces, and IPV4 filters
- DNS views, configuration profiles, DNS server groups, DNS servers, DNS zones, and resource records
- Deployment of NIOS-X instances

About Infoblox Universal DDI

Infoblox Universal DDI is reinventing DNS, DHCP, and IPAM. It's the most comprehensive DDI solution across hybrid and multi-cloud environments. It delivers simple, flexible and secure critical network services.

The Infoblox Universal DDI Advantage:

- **Cohesive Management:** Simplify critical network services across clouds with Universal DDI management
- **Comprehensive Visibility:** Automate discovery and analysis of assets across hybrid, multi-cloud environments
- **Proactive Security:** Using DNS to provide a critical layer of protection against cyber threats
- **Streamline Operations:** With a unified portal for Cloud, Network & Security teams
- **Cut Deployment Times:** Deploy critical network services faster with infrastructure-free DDI

Why Choose Our Professional Services?

- **Expert Guidance:** Our Infoblox Universal DDI specialists will leverage their extensive knowledge to optimise your customer's solution.
 - **Proven Methodology:** We employ well-defined and successful project plans to ensure timely completion and value delivery.
 - **Risk Mitigation:** Our experience minimises project risks and ensures a smooth implementation.
 - **Knowledge Transfer:** We prioritise communication and empower your customer's team to confidently manage the Infoblox Universal DDI solution.
